1. ABOUT OUR TEAM

Our team consists of 3 passionate individuals:

- Vsevolod Bolotov
- Juliana Stoykova
- Sofiya Chapkina

The goal for this project was to create a fitness website, and we came together to do exactly that.

2. ABOUT OUR PROJECT

Our project is centered around the idea of creating a smart and engaging fitness dashboard that helps users easily track their personal progress, workouts, and goals in one place. It aims to present fitness data in a clear, visually appealing, and interactive way, encouraging users to stay motivated and consistent in their training. By combining progress tracking and training resources, the dashboard simulates a real-life fitness assistant that supports users inbuilding and maintaining a healthy lifestyle.

3. USED TECHNOLOGIES

VS code

As the primary app we used for coding

HTML 5 and CSS

Used to make the core of the website

JavaScript

The primary coding language used to make the website more interactive

MS Teams

Used for communication

MS Word and MS PowerPoint

Used for documenting our project

GitHub and Git

Used as primary cooperation tools
